

MOON CYCLE

The Summer Solstice takes place on Thursday, June 21st. This day marks the height of masculine, solar energy, and is a great time to open to abundance.

The Full Moon will take place on June 28th in the sign of Capricorn. You may begin to see some of the intentions you set back at the Gemini New Moon on June 13th beginning to take shape. Capricorn lends solidity to everything it touches. It asks us to get practical, build, persevere, work hard, be responsible and achieve.

This Full Moon also completes the larger Capricorn cycle that was begun at the Capricorn New Moon back in mid-January. Think back to what you were focusing on at that time. It's likely that whatever ideas you had back then are starting to take shape with this Full Moon.

As a note of warning, Capricorn's lessons can be difficult. He's solid, but he's also a bit of a task-master. He expects us to work hard to gain his gifts. If the Full Moon brings you challenges, understand that they're lessons that simply must be learned and do your best to master them. My experience is that Capricorn's gifts, although hard-won, are some of the most valuable, long-lasting and ultimately life-changing.
