

To use this template, trace or print it onto your colored paper. Cut out along the outer blue lines. Fold the two side flaps in. Fold the bottom flap up and glue it to the side flaps. Insert your affirmation inside. Fold the top triangle down to close.

If you'd like to make a different sized envelope:

1. Draw a rectangle the size of the card you'd like to insert into your envelope onto the center of your paper. Draw an X in the middle of the rectangle.
2. Measure from the X to the top of the rectangle. Add $\frac{3}{4}$ inch to that measurement and draw a dot that far away from the top of the rectangle. Draw lines from that point to the corners of the rectangle to form the top triangle. Repeat for the bottom.
3. Measure from the X to the side of the rectangle. Add $\frac{1}{4}$ inch to that measurement and draw a dot that far away from each side of the rectangle. Draw lines from those points to the corners of the rectangle to form the two side triangles.
